Nathaniel James C. Carrillo

City add: 90G Anonas St. Brgy East Kamias, Quezon City
Mobile: +63 9605795072
Email: njccarrillo@mymail.mapua.edu.ph

AREAS OF INTEREST

AI-Driven Systems, Scalable Web Applications, Intelligent Network Solutions, Machine Learning & NLP

EDUCATION

MAPÚA UNIVERSITY
Bachelor of Science in Computer Science | Expected Graduation: September 2026

TECHNICAL SKILLS

Programming: Python (Data Science/AI), C++, JavaScript, TypeScript
Databases: PostgreSQL, MySQL, Oracle SQL, Supabase, Firebase
Specializations: Full-stack Development (Frontend/Backend), Computer Vision, Natural Language Processing (NLP)
Tools: Git, Machine Learning Frameworks

RESEARCH & PROJECTS

GraphTrust: Trusted E-commerce Platform

- Engineered a full-stack platform featuring a Machine Learning (Random Forest) trust-scoring engine to rate user reliability.
- Integrated KYC verification and behavior-based algorithms to detect and mitigate suspicious activity.

Petchingu: Smart Pet Management App

- Designed a lifestyle-integrated application with automated scheduling for nutrition and vaccinations.
- Focused on real-time notifications and community connectivity, mimicking Smart Home/IoT ecosystems.

Daycare Enrollment Web Application | *Target: Brgy. Santo Domingo, Cainta*

- Developed a scalable enrollment system for local government units (LGUs) to digitize manual administrative processes.
- Emphasized community digital inclusion and efficient database management.

MyAPT: Apartment Management Dashboard

- Built a centralized administrative tool for asset tracking, unit occupancy, and resident data management.
- Designed for high-level operational oversight, similar to Network Operations Center (NOC) tools.

SEMINARS ATTENDED

Getting Started with Blockchain: Guided Learning for Career Impact *Bitskwela Youth, Sonic Labs, Polkadot, and OKX* – Feb 2025

- Focused on decentralized networking, scalability, and the infrastructure of Web3 technologies.

AI & Me: Youth Leaders Bridging the Gap Summit Honor Society of Mapúa (HSM) Inter-School Organizations Summit – June 2024

- Mastered **advanced prompt engineering** techniques, focusing on **persona-based prompting** to generate authoritative academic and professional content.
- Explored AI integration strategies for streamlining professional workflows and research tasks.
